VOLUME 9. NO. 8.

WEST LIBERTY, MORGAN COUNTY, KENTUCKY, THURSDAY, AUGUST 15, 1918.

WHOLE NUMBER 424.

MONTDIDIER IS TAKEN BY FOCH; FOE IN FLIGHT

Allies Sweep Forward Along Entire Picardy Line, Taking Many Towns.

24,000 PRISONERS TAKEN

Capture of Faverolles by French Cuts Off Von Hutier's Retreat From Montdidier-American Troops Take Big Part in Offensive.

With the British Army in France. Aug. 12.-In Hielr advance the Brifish have captured Warvillers, Vrely, Foltes, Roslers and Vanvillers.

The enemy seems to be retrenting all along the battle line, especially in the center, where he is being heavily attacked by the British.

Chipilly spur, north of the Sonuce, was captured by the American and British troops. The attack begun ut five o'clock when the ullles moved forward hetween the Ancre und the Somme. They were supported by tunks and were preceded by a heavy larrage fire. The enemy was driven toward Bray, northeast of Chipilly. .

British tanks have been seen well to the cast of Meharlcourt. Streams of German transports are still going eastward. Two New German divisions have been engaged by the udvancing allies. Information received from prisoners indicates that the fighting may soon become heavier.

Hun Retreat Cut Off. Parls, Aug. 12.-Von Huller's retreat from Montdidler was cut off when the French cuptured Faverolles. The German position along the Montdidler-Rove road is precurious. At noon the French line ran from Faverolles, I'rennes, Rollot, Cuvilly, Ressons-Sur-Matz and Vigremont. This live puts Montdidier behind the French line. # The towns captured In the new Plcardy drive include the following:

Montdidler, Marlancourt, Meharlcourt, Bouchair, Libons, lininescourt, Proyost, Le Tronquoy. Le Freytoy, As and driven them back beyond the ders. Rosieres, Vanvillers, Plennes and Rollot.

Americans in Fight.

Washington, Aug. 12.-The British war office official statement on the drive la Pleardy reveals for the first time the fact that American troops are taking part in this smashing blow there against the enemy. There had been no information here to show that men from this country were in the drive and the identity of the unit or units is not known. Large numbers of American soldlers

are brigaded with the British for truining, and they have aided in offensive strokes, notably that at Hamel, July 4, whea they advanced with Austrailnns and took considerable ground and some prisoners.

The presence of the Americans he hind the British lines was believed to have enabled the British to assemble large forces for the present drive, but the news that Americans actually are in the fighting and have won "n considerable success" was received here with gratification.

"Can't Keep Americans Out." "You can't keep them out," was the comment of one high official when told that Americans were alding in the

Pleardy hattle. The fall of Montdidler and the beginning of the evacuation by the Germans of the Montdldler-Noyon front were greeted here with high satisfuction. It had been apparent to officers who are following developments closely that Montdidler must full very soon. The retrent of the enemy along the line southeast of that place promises to be a perlious movement, it was said. with the strong possibility of important captures in men and munitions by the French.

It would cause no surprise to observers here if Marshal Foch extended his thrust immediately along the line south of the Olse and link up the Pleardy front with the Alsne-Vesle line, tims threatening the enemy along the whole front between Belins and Albert slimittaneously. Even if the Germans in the Montdidler-Nayan pocket esenpe, n French drive south of the Olse would Immediately put them in Jeopurdy again if it met with my success,

So far the Franco-British movement has operated only in the northern hiw of the pincer thrust which is expected to develop. A French attack south of the Olse would set up the southern jaw of the movement.

Montdidler Captured.

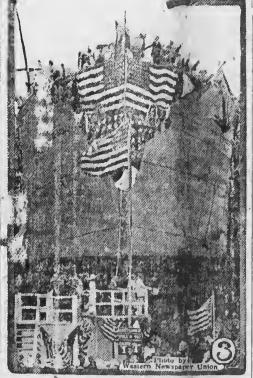

Loadon, Aug. 12.-The important town of Montdidler which was approximately at the anex of the German sal-Lent south of the Somme, has been captured by the nilles.

The number of prisoners taken from the Germans in the fighting in Pleardy has increased to 24,000, loday's wur Mee statement announces. One hundred additional Hernian guns

bave been taken by the allies. The new attacks by the French have extended the buttle line some sixteen mlles farther to the southeast in the Montdidler nren. In this movement the French scored an advance of four tion of their ailles.

miles in six hours. To the north the important junction

1-American, English, Canadan, New Zenland and South American aviators examining a map prior to over the German lines in France, 2-11m prisoners being ande useful in carrying wounded British soldiers abourd a hospitul ship. 3-Steamer Quisconck, first vessel built at Hog Island yard, being hunched, the president being present and Mrs. Wilson christening the ship.

British and French Begin New Offensive Between Albert and Montdidier.

HAIG DIRECTS THE DRIVE

Allies Force Crossing of the Vesle River in Face of Strong Resistance-Plans for Siberian Expedition -March States American Army Program.

By EDWARD W. PICKARD. Having thoroughly whilpped the armies of the German crown prince

Veste river, Fach, now a marshal of ons-Sur-Mutz, Vignemont, Vrely, Fol- France, turned his attention in the middle of the week to the forces under the Havarlan erown prince, Rupprecht. At dawn on Thursday the Itritish Fourth army and the French First army, under command of Field Marshal Halg, began an offensive ore a wide front in the region east and southeast of Amlens. The front under attack was about twenty-eight miles in length, from Athert south to the vicin-

lty of Montdidier. Within 24 hours the allled forces had penetrated the enemy lines to points from six to seven miles beyond the start. had taken more than 10,000 prisoners and great quantities of material and many gmis, and hid occupied immercus towns. Their owil losses were remarkably light. Tunks led the infantry in the attack and did wonderfully good

Complete success in this offensive would result in obliterating the German sullent in the Montdidler ceglon and would imperit the entire than line from Relms to Ypres. The Germans. seem to have autlelpated this movement by the allies and some days prevlonsly withdrew their forces there and in other sectors to stronger positions. Progress by the allies here carries them into the Pleardy country which was rayaged by the Germans in their retreat of March, 1917, and again devastuted by them when they drove forward this year. - EE-

The defeated but not disorganized Huns between Solssons and Relms, as was predicted, guthered their strength for a pause in their retreat between the Vesle and the Alsne. Their guns were brought into play from the platenn in that region which commands the Vesle valley. The Germans, Indeed, made stremmis attempts to precrosslag the Vesle, especially in the vicinity of Fismes, but numerous relatively small mills forced the crossings and held onto their new positions desalte furlous counter-attacks. These Braisne and Fismes. I'n to the close of the week Murshal Foch had not tried to send any very large forces. Politiva. across the river, probably waiting untll his urtillery could drive the Huns. from the nearer bills to the north. The Germans were using only medium callber guns, which was taken to mean that their heavier artillery was being placed north of the Alsne to defend that line; for there seemed little doubt that they would be forced that furnorth before very long. Their position south of the Alsne was said to be really untenalde though seemingly strong At the west end of the line the French and Americans were steadily pushing east along the Alsue, and at the east end immediately north of Itelms the French made considerable advance be-

tween the rallways running to Laon and Rethel. The city of Fismes, which was so gullantly tuken by the Americans, was exidoit unity be part of a set plan of as gallantly held against all attacks. destroying important navigation sig- cars, in order to destroy the monopoly though the Germans deinged it with exidosive and gas shells. The muchine gun and rifle fire of the Yunkees was longer cause the ailles extreme anxison & Co., luc., and the Col by Packso accurate us to arouse the adultate lety, for it is evident they are on the larg company. The commission ne-

Activity increased during the week 450 submarines and been sunk by the linting the ment and other food, supplies

nade towned Betlinge and Hazebrouck. hawe and the Chirence. In other sectors of the northern line also the British attacked successfully. These operations probably were all reinted known here. At least, it was clear that Foelt had no Intention of ullowlag the Hnns to have any rest, now that he has them on the defensive.

Authorities admit that the kalser's strength is still prodigious and that he has large reserves, but all unite in asserting that he has passed beyond the high point of power and efficiency and can never reguln numerical supremuck. nor can be ever again have the oppor timity to achieve a victory that was his two months ago. Those of his beople who know the truth now admit that his nitimate defeat is a cerminty. The more fearless papers of Germany and Austria do not hesitate to say this plainly. The military and pan-German leaders are held responsible, and as their only hope lies in administering trained. to the allies the crushing blow so long produces by factor was recomble to 000 men, minimum strength, expect another great Hun offensive hefore long. That is, if Mar ! gives them a chance, which doesn't seem to be a part of his present plans,

Arrangements for the American-Jananese expedition to Siberia have been going forward rapidly and the Czeeho-Slovak forces over there will soon have the active support of a small but competent body of allled troops. It is announced that two regiments now in the Philippines will form part of the American contingent, and that it will he communded by MuJ. Gen. William S. Graves until recently assistant chief of shiff of the army. Later It will he determined whether he will command the entire expedition. At Vindlvostok the Americans will be Joined by an equal number of Jupunese and probably they will first drive from the Amur branch of the trans-Siberlan rullway the holsheviki and the Teuton war prisoners who were armed to aid them. Eastern Siberia would then he In the control of the ullies and loyal Russhins. British forces were landed at Vludivostok last week, for what purpose was not stifted

Japan has given avidence of eagerness to do more in Siherla than merely ald the Uzechs, if she has the excuse, and it is reported that Lenine now plans to declure war on the Japanese, being lastigated by Germany. The successes of the Czechs have had great effeet in Austria, and reports from that country tell of the desertion of about a fallion soldiers of the Austro-Hungarlin army. Eighty thousand of these deserters are llying in Vienna and the government fears to take any step agalust them.

Conditions in northern Russia are vent the French and Americans from very encouraging. The ailles have been driving the bolshevikl south from Archangel, and a new government has been established in that city embracing half a dozen districts. Volunteer detachments of White guards are asoperations were mostly between sisting the allies. M. 1. Terestchenko. minister of foreign uffairs in Kerensky's cabluet, has been assussinated in

Seemingly not yet quite satisfied that Zeppelins us raiders are a fullure, the Germans sent a fleet of five of these monsters across to raid England last week. Their coming was sigmied and they were attacked by the British In flatties over the sin, its communider, the noted Captaln Strasser, and all -- NI --

500,000 men in France by January 1. General Murch told the committee the United States can end the war by getting 4,000,000 trained troops, fully eunlaned, Into France, and he Inthusted that Marshal Foch Is only await ing the urrival of the Americans in full strength to burl the entire united military strength of the nilles at the Huns on the western front. This tremendons ldow, he inflamted, was due to full next suring. The chief of staff sald he did not believe it would be necessary to send the elgliteen-year-old class to the firing line, but that the government wants these young mer trained and in readiness. He said is would be satisfactory if the fill were passed immediately after congress resumes the transaction of business or August 26. Some of the sengtors belleved quicker action would be advisable. Chairman Dent of the house milltary affairs committee, clinging to the antl and ante-war Ideas that always have animated his actions, shows no desire to have the bill considered by his committee in time for early pas sage. It was stated that the sensible members of the committee, hended by Representative Kahu, probably would have to take charge of the measure. Why the small-minded Dent 'ts not ousted from his chalmnanship of this most Important committee remains one of the mysteries. Other men connected with the administration and the government, who were puelfists and small army and navy advocates, have seen the error of their ways long since and are doing everything in their power to help win the war, but no such light Illuminates the dense mind of Dent.

The house ways and means committee is still torsy with the next revenue measure. Secretary of the Treasury McAdoo has informed Chalrunn Kitch-In that he is strongly in favor of a the war profits tax of 80 per cent, which any Increase in the existing excess profiteering. The committee has agreed upon a section that would call on the president to pay a tax of \$24. --- Will ---

Origin of "Doughboy."

A phrase, strictly American in its modera usage, is that of "doughhoy" healthful development. as applied to an American soldier. An American infantry soldier recently exli war n great number of federal troops were waiting for uniforms, which were made but lacked buttons. So great was the hurry that eventually the mer went round the houses in the town and collected buttons off the women's clothing. These were for the most part large huttons from overcoats. Natural ly the infantry looked funny with their uniforms fastened by great overcont buttons. Those resembled hard tack (inrge, round, dry biscuits ninde of dough) and hence sprang the word 'doughboy,' which has been kept in the United States army as a siang phrase for an infaatry soldier."

Conquered at Last.

An unknown genius at Camp Kearney is entitled to a monument "everywhere in America." He'd heen a naughty boy or something and was as signed to cut onions for eamp mess as n punishment. Imagine the surprise of the corporal of the guard when he discovered the offender blithely dissecting the Bermudas under the proteetion of his gas mask. "Youse nin'i sufferin' no punishment," scoffed the officer, adding, "but 'tis n ghrand idea I see by my last paper that my and 'tis the wimmen o' the countbry

> History Repeats Itsef. Not for the first time have German invaders been checked at Chateau-Thierry. It was there, in February 1814, that Napoleon, by one of those fell upon Biucher, who wus confidently marching upon Paris. By swift blows on succeeding days he shattered the sian army, capturing almost all their artillery, and then fell upon Blucher's main force, in the vicinity of Chateauback, with heavy losses.

Forty-four years ago the game of own tennis was introduced by a Bostoaian, according to records in the possession of George Wright, father of Mussuchusetts man brought home nets, racquets and balls, as well as a book

of rules then governing the game, and set up a court at Nahant. A little laler courts were inid out at Newport, R. l., und also on the grounds of the Staten island Cricket club, Livingston, Statea

U.S. FOOD ADMINISTRATION

FACE the FACTS

ET us face the facts. The war situation is critical.

Unless the Allies fight as they never yet have fought, defeat threatens. Hungry men cannot fight at their best; nor hungry nations. France, England, and Italy are going hungry unless we feed them.

Wheat Savings-They must have wheat. It is the best food to fight on. It is the easiest to ship. We alone can spare it to them. By saving just a littleless than a quarter of what we ate last year-we can support those who are fighting our battles. And we can do it without stinting ourselves. We have only to substitute another food just as good.

The Corn of Pienty-Corn is that food. There's a surplus of lt. Providence has been generous in the hour of our need. It has given us corn in such bounty as was never known before. Tons of corn. Trainloads of corn. Five hundred million bushels over and above our regular needs. All we have to do is to learn to appreciate it. Was ever patriotic duty made so easy? And so clear?

America's Own Food—Corn! It is the true American food. The Indians, hardiest of races, lived on it. Our forofathers adopted the diet and conquered a continent. For a great section of our country it has blong een the staff of life. How well the South fought on it, history tells. Now it can help America win a world war.

Learn Something-Corn! It isn't one food. It's a dozen. It's a ccreal. It's a vegetable. It's a bread. It's a dessert. It's nutritious; more food value in it, dollar for dollar, than meat or eggs or most other vegetables. It's good to eat; how good you don't know until you've had corn-bread properly cooked. Best of all, it's plentiful and it's patriotic.

Corn's Infinite Variety-How much do you know about corn? About how good it is? About the many by not knowing more about it? Here are a few of its uses:

There are at least fifty ways to use corn meal to make good dishes for dinner, supper, lunch or breakfast. Here are some suggestions:

HOT BREADS Boston brown bread. Hoecake. Muffins. Biscults. Griddle cakes. Waffles.

DESSERTS Corn-meal molasses cake. Apple corn bread. Dumplings. Gingerbread. Fruit gems.

HEARTY DISHES Corn-meal croquettes. Corn-meal fish balls.

Meat and corn-meal dumplings. Italian polenta. The recipes are in Farmers' Bulletin 565, "Corn Meal as a Food and Ways of Using It," free from the Department of Agriculture.

WOULD LINK EAST AND WEST Proposal to Make the American Expeditionary Force in China Practically a Student Army. Under the agreement entered lato

between the powers and China following the Boxer uprising in 1900, the United States government was permitted to keep an expeditionary force All pupils desiring to enter the of about 2,000 men in China, says Millard's Beview. This force is stationed at Tlentsin und Pekin, about 1,500 men being statloaed ut the former place and the rest stationed as a legation guard in Pekia. It has now been proposed to the American government at Washington that the regular army troops stationed at Tlentsin be recalled to America for service la France and their places taken by a contingent seven years, one of the pion er of the same number of men who are ous cantonments under the provisions of the selective draft. The Iden originated with Maj. Arthur Bassett, judge advocate of the urmy coatingent at Tientsia, and formerly United States district attorney of China. Under the plan suggested by M. jor Bassett the coatingent of regular army troops now in China should be returned to Ameriea and sent to Frunce, us the men desire, and in their place the United States government should send out 1.500 men specially selected from the tandpoint of education and training, who would be available upon their rethrement from service in Chian to engage la trade or other activitles in China and the far East. Major Bassett would select the new men for service in China largely from the great group of college graduates und students who have been drafted for service in France. He would bring these men to China and, in addition to their regular army drill, he would have them instructed in the Chinese language and in the customs, history and traditions of the country; and at stated intervals he would have them make trips into all parts of China for study and Investigation. In short, these 1,500 men would receive a three years' coliege course on Chinn, so that upon their retirement from the service they would be at liberty to engage in trade, missionary, educational or any other activity they desired in the far East, or if they desired to return home they would possess laformution regarding China that would be of the highest value to China. The plan has been upproved by the American chamber of commerce and other organizations in China and has been commended to the slate and war departments at Wash-

> necessary if the future peace of the world is to be malatained. Appearances Deceptive. The war has turned the habits of round-the-towners so topsy thrvy that tell from a guince whether a man is

a church member or a disciple of John Barleycora these days. Two middlenged men were riding on a Fifth aveaue hus recently. Each had all the surface indications of being merry old souls, who tairled at the dianer table and looked upon the wine while it was fizzing. Both had red faces and pronouncedly "bay windows," And what do you suppose they were talking about? Naturally, one would say they vere discussing the attitude of congress for trying to make the country bone-dry. But nothing of the kind, They were tulking shout Bibles, the minher they had distributed to sallors and soldlers and the price of them. And both chuckled because the war had not affected the price of the good book, which could be bought as low es 15 cents. When you hear conversation of that nature in this town, it begins to book as if the hour had

struck .- New York Sun.

Pays to Keep a Toad. The toni is useful because of its ilet. No less than eighty-three species of insects, mostly injurious, have been proved to enter into its dietary. In lds "Civic Illology" George W. Hunter rays: "A toad hus been observed to snap up 128 lijes in hulf an hour. Thus at a low estimate it could easily destroy a thousand insects during a day, and do an hamense service to the garden during the summer. It has been estimated by Kirkland that a single toml may, on account of the entworms which it kliis, he worth \$19.88 each season it lives, if the damage done by each cutworm be estimated at only

War at Close Range. Margaret Deland, the New England novelist, writes from Paris: "Over in America we thought we knew something about the war and the conditions in France, but when you get here the difference is as the difference between studying the laws of electricity and belug struck by lightning. I have been struck by lightning. The only way in which I can keep sane and stendy is to book very, very closely at my own Intmediate iittie trivial, foolish job-writ-I dare to lift my eyes to the black hor-
